

ON SECOND THOUGHT — EPISODE 4

Bibliography & Sources

Primary Research

Molesworth, B. R. C., & Estival, D. (2015).

Miscommunication in general aviation: The influence of external factors on communication errors.

Safety Science, 73, 73–79.

Demonstrates the impact of workload, information density, and language factors on communication accuracy.

Krivosos, P. D. (2007).

Communication in Aviation Safety: Lessons Learned and Lessons Required.

Presented at the Australia and New Zealand Societies of Air Safety Investigators Seminar.

Foundational work on expectation bias and perceptual filtering in aviation communication.

Accident Case Study

Tenerife Airport Disaster

The deadliest aviation accident in history; a defining case of expectation bias, non-standard phraseology, and misinterpreted clearance.

Human Factors & Communication

Barshi, I., & Farris, C. (2013).

Misunderstanding in ATC Communication: Language, Cognition, and Experimental Methodology.

Explores cognitive limits in communication, including the “three-item threshold.”

Cushing, S. (1994).

Fatal Words: Communication Clashes and Aircraft Crashes.

Classic analysis of how ambiguity and language breakdowns contribute to aviation accidents.

EUROCONTROL. (2006).

Air-Ground Communication Safety Study: Causes and Recommendations.

Identifies operational contributors to communication failure, including workload, accent, and expectation.

Cognitive & Human Performance Foundations

Endsley, M. R. (1995).

Toward a Theory of Situation Awareness in Dynamic Systems.

Human Factors, 37(1), 32–64.

Defines perception, comprehension, and projection as the core of situational awareness.

Wickens, C. D., & McCarley, J. S. (2008).

Applied Attention Theory. Explains attentional limits and workload-driven degradation.

Kahneman, D. (2011).

Thinking, Fast and Slow. Framework for fast, intuitive cognition and its inherent biases.

Operational Doctrine & Standards

International Civil Aviation Organization (2007).

Language Proficiency Requirements. Establishes global standards for aviation English proficiency.

Federal Aviation Administration

Aeronautical Information Manual (AIM).

Defines standard phraseology and communication procedures for U.S. aviation.
